

ISOLUS CARE INSTRUCTIONS

BEFORE USE

- Carefully remove plastic packaging. Take care not to cut through the mattress topper.
- Place compressed mattress topper on a flat surface in a well ventilated room and allow 48 hours for expansion.
- Due to the unique properties of latex foam, dimensions after expansion may vary; this is normal and will not affect the performance of the mattress.
- New latex foam may initially have a slight odor; it is completely harmless and will dissipate over a short time with regular use.

WASHING CARE

- Pre-wash the zippered cover before first use.
- Wash zippered cover separate from other items as the zipper may cause damage to clothing or linens.

- Do not overload the washing machine. Overloading can cause fibers to break down from excessive abrasion and agitation.
- Wash the zippered cover in warm water using a non-chlorine bleach detergent on a gentle cycle with a cold water rinse.
- The mattress topper can be spot cleaned with mild detergent by hand only; do not soak or machine wash the foam. Rinse with warm water.

DETERGENT

- Use a mild liquid detergent, preferably non-alkaline, without added bleach or whiteners.

BLEACHING

- Do not use chlorine bleach as it can weaken fibers and cause them to yellow prematurely.
- If white fabrics need bleaching, use an oxygen-based bleach.

DRYING

- Tumble dry zippered cover on low heat.
- Never use a high heat setting or over dry; this will weaken the fibers, cause shrinkage and shorten the life of the cover.
- After spot cleaning the mattress topper, dry at room temperature away from heat or light. Do not machine wash or dry.
