**ASSEMBLY INSTRUCTIONS**

1. Unfold the bed frame while on its side until the length of the frame is open. Unfold the legs until you hear a clicking sound. The legs automatically lock in position as shown if figure 1. Place bed frame face up.

2. If you have a Highrise bed frame that is Queen size or larger, use the included brace to secure the adjacent frames together as shown in figure 2.

To fold up the bed frame, depress the tab at the end of the locking slider toward the frame to release the locking mechanism. Both tabs on each end will have to be depressed before the legs may be folded in.

For questions regarding assembly, missing parts, or defective issues - do not contact the retailer where the merchandise was purchased, please contact Structures by Malouf directly at 800-517-7179 or email structures@malouffinelinens.com.
