WARNINGs

IMPORTANT: PLEASE READ ALL SAFETY INSTRUCTIONS THOROUGHLY BEFORE USING THIS PRODUCT. SAVE THESE INSTRUCTIONS.

BEFORE USE
- Carefully remove packaging. Take care not to damage the bed frame or any included parts.
- Carefully read and follow the set up and installation instructions included with the product.

ELECTRICAL
- This product is for use on a standard 120-volt circuit.
- Always use a grounded, electrical surge protection device with this product. This product should be plugged directly into the surge protection device and the surge protection device should be plugged directly into a wall outlet.
- Only connect this product to a properly grounded outlet.
- Always unplug this bed from the electrical outlet before cleaning or servicing.
- Never operate with a damaged cord or plug. Keep the cord away from this product’s moving parts.
- Keep the cord away from heated surfaces.
- Do not use this product outdoors.

SMALL CHILDREN AND PETS
- Immediately dispose of all packing materials that may pose a suffocation risk.
- Do not allow children or pets to play on or under the bed. Children should not operate this product without adult supervision.

PACEMAKERS
- Some pacemakers may detect motion by this product as a false sense of movement or exercise. This may or may not affect your pacemaker. Talk to a physician to address any concerns.

HOME USE / HOSPITAL DISCLAIMER
- This product is designed solely for in-home use and not as a hospital bed. The product has not been tested to meet hospital standards. Do not use with oxygen or other flammable gasses.

WEIGHT RESTRICTIONS
- The recommended weight restrictions for the Structures™ M555 Adjustable Base are as follows: (all weights include the weight of the mattress and bedding)
  - This product will support the recommended weight limits when weight is distributed evenly across the base. This product is not designed to support or lift this amount in the head or foot sections alone. Consumers should not enter or exit the bed when any portion of it is in the raised position. Do not sit on the head or foot sections while in the raised position. Exceeding the recommended weight restrictions or other misuse of this product could damage the bed and void the warranty.

SOUND
- The massage function will emit an audible tone during operation. The volume of this tone is directly related to the location and environment. For example, a bed placed on wooden flooring may increase the audible tone of the massage function, where a bed placed on carpet may emit a softer tone.

BEFORE USE

**PRODUCT RATINGS**

**IMPORTANT: USE THIS PRODUCT ONLY AS DESCRIBED IN THESE INSTRUCTIONS. DO NOT MODIFY ANY PARTS OR COMPONENTS.**

**MOTOR RATINGS**

- The Structures™ M555 Adjustable Base motors are not designed to operate for more than two continuous minutes within an 18-minute time period. Exceeding this rating will shorten the life of the motors, and void the warranty.

**POWER RATINGS**

- **INPUT:** AC 100-240V - 50/60Hz, 1.5 Amp
- **OUTPUT:** DC 29V-2A

- This product is designed to have no maintenance requirements by the user. Please do not open any motor compartments, alter the wiring, modify the base, or change the product in any way as it will void the warranty.

**FCC COMPLIANCE**

- Operates on 2.4 GHz frequency transmitter.
- This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
- To comply with the FCC RF exposure requirements, no change to the antenna or the device is permitted. Any change to the antenna or the device could result in the device exceeding the RF exposure requirement and void user's right to operate the device.

For any questions or concerns regarding this product please contact MALOUF® directly.

Get to Know Your Product

Before beginning assembly of the STRUCTURES™ M555 Adjustable Base, please take a moment to familiarize yourself with the parts and location of components. See the adjacent image for a detailed overview.

If any parts or components are missing, or are different than shown in the adjacent image, do not attempt to complete the assembly process and contact customer support: 800.517.7179 / customerservice@maloufsleep.com.
ASSEMBLY

Before You Begin

A minimum of two people are required to assemble this adjustable base.

Open box on the floor in the flat position, bottom facing up, to avoid damage.

Step 1:

Place the box in the room the bed will be used with the bottom of the box facing up.
Carefully remove the binding straps and packaging material, taking care not to puncture the box with any sharp objects.

Step 2:

Remove the bed base from the box and set mattress (top) side down on the floor (see image A).
Remove all plastic and zip ties. All components and parts are located in the underside of the base.
Remove attached parts and set aside in preparation for assembly (see image B).
Check to make sure all parts have been included and are not damaged (see page 2 for a list of all parts and components).

King Size Only
ASSEMBLY

Step 3:
Hand-tighten all six legs (seven for King size) into the bed frame until secure. Note that there are two location options for each leg, an outside placement or an inside placement. Tighten the legs in the location of your choosing, maintaining a consistent inside or outside location throughout. Take care not to over-tighten (see image A). To reach a 15-inch height from floor to top of deck one should use a 3-inch + 3-inch + 6-inch leg assembly.

Note: Ensure the bottom of each leg has an end cap attached (see image B).

Step 4:
Install the power cord by connecting the cord jack to the receptacle on the bed motor (see image C). Be sure the cord is connected completely and securely.
ASSEMBLY

Step 5:
With two to four people, lift the bed by the metal frame and turn it over so the mattress (top) side is facing up (see image A). Take caution not to lift the bed with the fabric, or to use the legs as pivot points causing angled pressure as this may cause damage. Move the bed to the desired location.
ASSEMBLY

Step 6:
To install the mattress retainer bar, insert one end of the retainer bar in its respective slot until it slides fully into place (see image A). Flex retainer bar to insert the other end on the other side.

Step 7:
Plug the power cord into the wall outlet and run the test on pages 29 – 30 of this manual. You may want to familiarize yourself with the remote control functions (pages 11 – 18) prior to running the test.
Overview

All of the functions of the bed can be operated with the remote control. The remote control comes with pre-programmed buttons that will automatically adjust when pressed, or you can manually control adjustments using the arrow buttons on the remote control. See the diagram to the right (see image A) for a complete list of remote control functions.

Remote Control Battery Installation

Remove the battery cover on the back side of the remote control. Insert the three included AAA batteries (see image B).

Programmable Buttons

Zero Gravity, Anti-Snore, TV/Read, and Lounge are all pre-programmed positions that can be adjusted and saved to match your preference. Additionally, the M555 features one memory position (MEM) that can be programmed for your convenience. Simply adjust your bed to the desired position, then hold down the Flat button, then simultaneously press the position button you want to reprogram.

Overview
The original remote that comes in the box is already paired to the foundation. No further action is required. In the event that the remote is not paired with the base, begin by checking the following.

Step 1:
Ensure the remote batteries are functioning. Replace if necessary.

Step 2:
Ensure the power cord is plugged into a powered source.

Step 3:
Press and hold the Head Up and Foot Up buttons simultaneously (see image A). Then also press and hold the blue button on the control box cord until you hear two beeps (see image B).

The blue pairing button can also be used to lower the base to the flat position in case of an emergency (see battery backup section on pages 23 – 24).
REMOTE CONTROL

Lock Safety Feature

The remote control can be locked to prevent movement of the bed. When the remote control is locked, no buttons will function and the Lock button will illuminate red when a button is pressed.

To lock the remote control:
Press and hold the Lock button for 5 – 7 seconds, or until the button stops flashing red.

To unlock the remote control:
Press and hold the lock button for 5-7 seconds, or until the button stops flashing.
The remote is now unlocked and ready to use.
MASSAGE

Massage Function
To activate the massage function, press the desired Back or Foot button once. To adjust the intensity of the massage function, press the Back or Foot button again. There are three levels of intensity.

Massage Timer
With the massage function in use, press the Timer button to select a 10, 20, or 30 minute massage. The light below will illuminate indicating which timer setting is activated.

Massage Type
There are four massage options: oscillate, wave, pulse or constant. Press the Type button to activate an alternate massage option.

Massage Off/Recall Last Setting
With the massage function on, press the Off/Last button to turn off all massage functions. Press the button again to return to previous massage type and timer settings.

NOTE:
Allow the massage function to rest for 30 minutes after each use.
Overview

The electronic components are pre-installed and no assembly is necessary; however, some setting and input locations are important for proper setup and functionality (see images A and B to become familiar with input, setting and part locations).
USB Ports

USB ports are located under the head portion of the bed base at two locations (see image A). To access the USB ports, press the Head Up button to raise the bed and reveal the USB ports. Once your device is plugged into the USB port, you may lower or adjust the bed to your preference.
Overview

Important: The backup battery is only to be used in case of a power outage. Batteries are not to be used for normal operation of the bed. The backup battery will not support repeated movement for an extended period of time.

Backup Battery Use

Use two 9V batteries only (not included). If a power outage occurs, install the 9V batteries into the power supply to allow temporary power to the base (see image A).

Installing Batteries

Unplug the power cord from the outlet and remove the cover from the compartment on the underside of the power supply (see image B). Place two 9V batteries inside, close the cover and plug the power cord back into the wall outlet. After power is restored, unplug power cord, remove the batteries, then plug the power cord back into the wall for normal use.
SYNCHRONIZING
TWO BASES
(for Twin XL and Split sizes only)

OPTION 1: WIRELESS
Pair Single Remote to Operate Two Bases Simultaneously

Step 1:
Plug Base A and Base B into your outlet.

Step 2:
With Remote A paired to Base A and Remote B to Base B, make sure each remote moves with its respective base. If not, pair both remotes by following the instructions on pages 13 and 14.

Step 3:
Pair Remote A to Bases A and B by pressing and holding the Head Up and Foot Up buttons on Remote A. Then press the blue Pairing button on the power cord for Base B. You should hear two beeps.

Step 4:
Ensure Remote A moves both bases by pressing any button on the remote control.

Pair Second Remote to Operate Two Bases Simultaneously

Step 5:
On Remote B, press and hold the Head Down and Foot Down buttons at the same time. Within five seconds, press and hold the Head Up and Foot Up buttons on Remote A. After two seconds, release the buttons on Remote A then Remote B.

Step 6:
Ensure each remote moves Base A and Base B. If any of these steps didn’t work, unplug both bases and remove the batteries from each remote. After five minutes, reconnect Base A and Base B to the power source and return the batteries to Remote A and Remote B. Then repeat steps 1-6.

NOTE:
To operate the beds separately again, press the Head Up and Foot Down buttons simultaneously on Remote B. Follow the instructions on pages 13 and 14 to pair your remote with the desired base.
SYNCHRONIZING TWO BASES
(for Twin XL and Split sizes only)

OPTION 2: WIRED

Step 1:
Place two Twin XL or split size adjustable bases next to each other in desired location. Plug in Sync Cable (see image A) to the control box of each base into the “Program” input (see image B) on the control box.

Step 2:
With the connecting cable installed, use remote and test all functions of the bed base (see pages 29-30). If remotes are not working, troubleshoot the problem by following the instructions on (pages 13-14).

The two bases are now connected and ready for normal use.
Overview

To ensure proper setup, use remote and test all functions for 3 seconds.

Important: Always return the base to the flat position when switching between preset options.
If one or more functions of the bed have stopped working or one or more of the remote control buttons activate the wrong function:

Check under the bed base to verify the wired connections are secure and there are no cords or bedding obstructing the movement of the base. If the remote control activates the wrong function, the motors are plugged into the wrong input on the control box. Switch the input location of the cords on the control box.

The remote control lights no longer illuminate / the remote won’t operate the bed functions:

Ensure remote lock has been deactivated (see pages 15 – 16). Make sure the batteries are installed correctly or install three new AAA batteries into the remote control.

The remote control lights illuminate, however no functions of the bed will operate:

Check to ensure the power cords are properly connected.

Unplug the base for 1 hour to reset the electronic components.

Plug base into a different electrical outlet, or test current outlet with another working appliance. A grounded electrical surge protector is recommended with use of this product.

WHAT IS COVERED
This warranty covers any defects in materials or workmanship under the conditions and exceptions stated below.

HOW LONG COVERAGE LASTS
This warranty runs for up to 20 years from the date of purchase, according to the tiers set forth below.

WHAT MALOUF® WILL DO
YEAR 1:
Warranty covers defects in the workmanship or materials for a period of 1 year from the date of purchase. Malouf® will send replacement parts for any defective part to the original purchaser ONLY, and Malouf® will pay all authorized labor and transportation costs associated with the repair or replacement of any parts to residents within the continental US.

YEARS 2 – 5:
During the years 2 – 5 from the date of purchase, Malouf® will offer replacement parts for any defective part to the purchaser. The purchaser shall bear all service, transportation, labor, and shipping costs associated with the repair or replacement of the defective part(s).

YEARS 6 – 20:
During the years 6 – 20, Malouf® will offer replacement parts for any mechanical bed part (excluding electronics, electrical components, drive motors, and massage motors). Purchaser shall pay 1/15th of the replacement cost of the defective part multiplied by the number of years since 5 years after the warranty commencement date, and Malouf® shall bear the remainder of the cost of the replacement part. The purchaser shall bear all service, transportation, labor, and shipping costs associated with the repair or replacement of the defective part(s).

HOW TO GET SERVICE
Email warranty@maloufsleep.com to submit your warranty claim. Please keep your receipt so that we may process your warranty request.

HOW STATE LAW APPLIES
This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state.

For any questions or concerns regarding this product please contact MALOUF® directly.
